

Hugin Instructions

An Appendix Of Geometric Corrections

© 2008 R.W. Clark

rwclark@cyberanalysis.com

The pages that follow are a rough stitch of two shots under the various corrections that are available to Hugin as of this writing. There is not much to say beyond the simple labels and their examples for comparison. Other subject shots would require different corrections compared to those that may seem appropriate to this selection.

Rectilinear Correction:

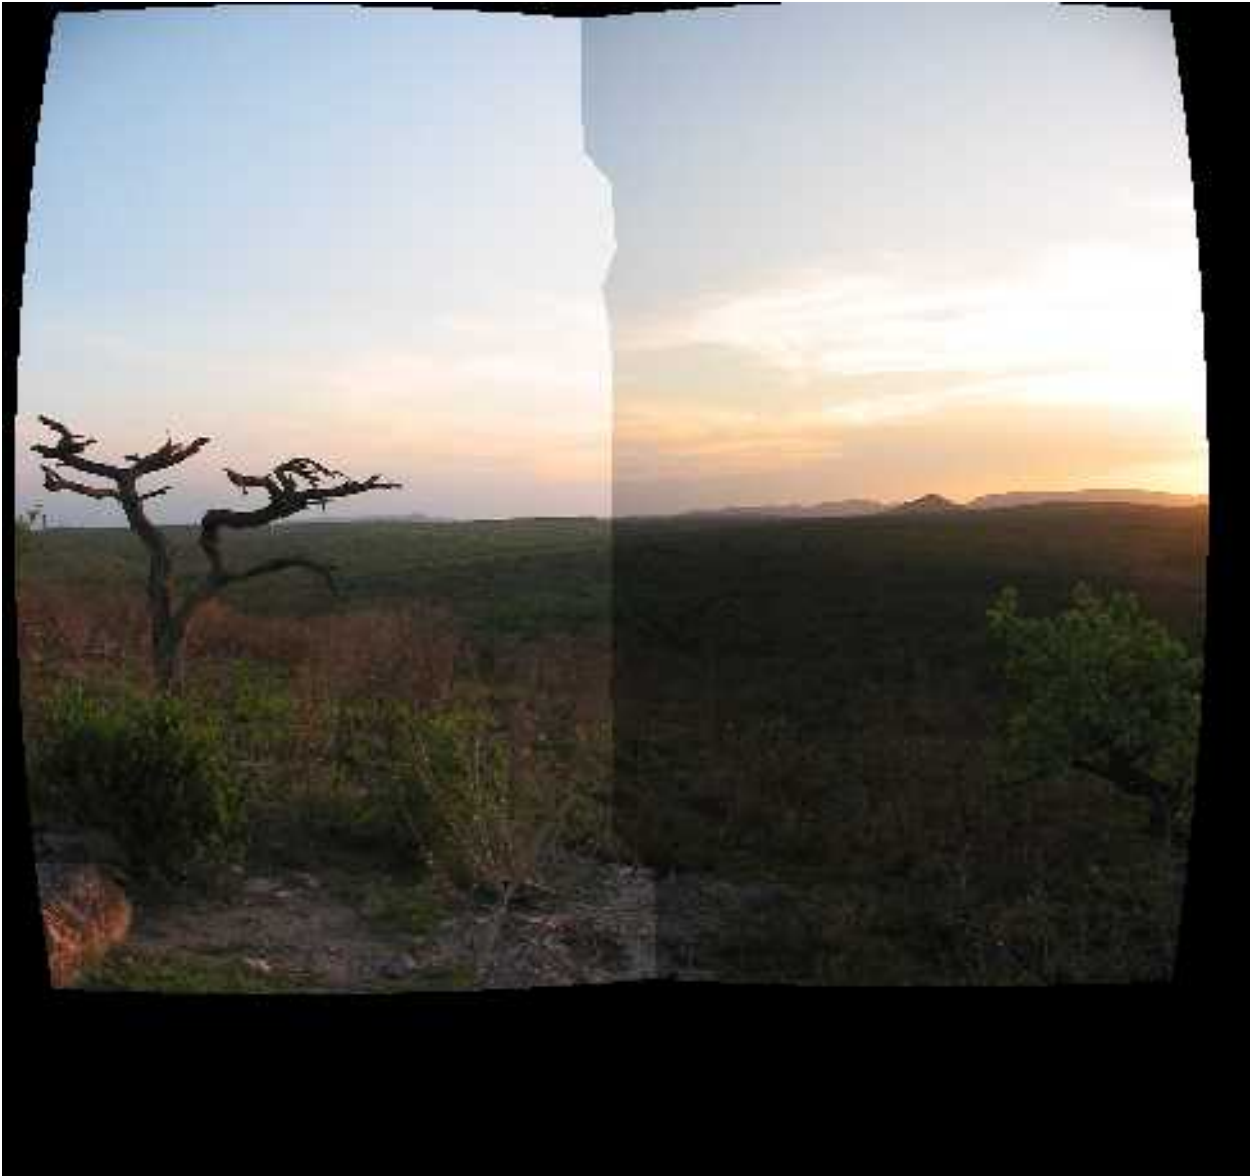

Panorama Correction:

Equirectangular Correction:

Fisheye Correction:

Stereographic Correction:

Mercator Correction:

Trans Mercator Correction:

Sinusoidal Correction:

Lambert Equal Area Conical Correction:

Lambert Equal Area Azimuthal Correction:

Miller Cylindrical Correction:
